

Side Design

A flowing, elegant side design.

- New character line and wedge-like shape looks more active.
- Flowing lines from front-end to the rear create an elegant form.

Aerodynamic Performance

The world's finest level $CD=0.25^*$ has been achieved!

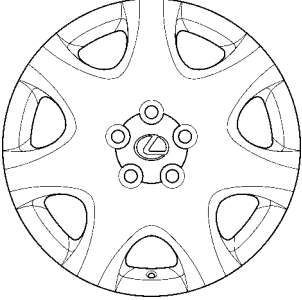

Dramatic improvements in aerodynamic flow by making the underbody flat, achieves the world's finest level CD (coefficient of drag) $drag=0.25^*$.

Straight-line stability and steering stability during high speed driving are improved while at the same time, wind noise is reduced.

*:With the air suspension. The coefficient of drag of the model with the coil spring suspension is $CD = 0.26$.

Tire & Disc Wheel

Size	225/55R17 7 1/2JJ	
Material	Aluminum	
Off Set	45	
P.C.D.	114.3	
Surface Finishing	Silver painted	Chrome plated
Specification	Standard	Option (for Europe only)
