

INTERIOR

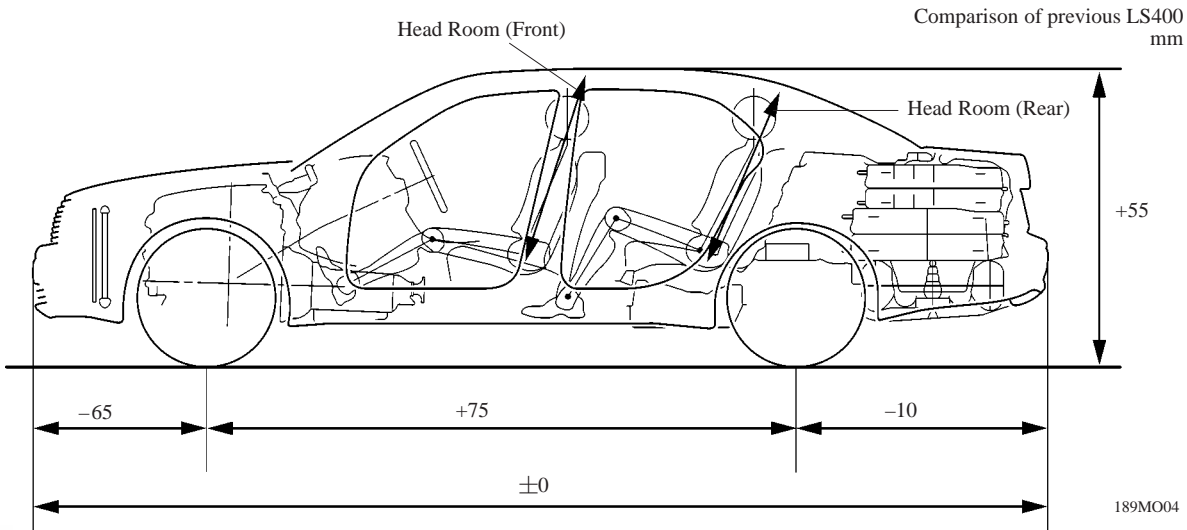

**An uncompromising approach towards comfort.
The resulting interior exudes an atmosphere that enriches the spirit.**

Package

Compared with the previous LS400, a new package that, for the same length and width, offers larger cabin and luggage space.

We have further improved ride comfort and also ensured excellent driving stability, by lengthening the wheel base. Without harming the exterior appearance, we have increased the overall height and improved headroom. By moving the fuel tank under the rear seats, the luggage space has been increased.

Interior Design

The large and comfortable interior space becoming the LEXUS flagship sedan has been carefully sculpted for maximum emotional effect and a feeling of luxury and hospitality.

We have produced an interior that corresponds to the LEXUS flagship sedan [LS430]. Careful attention has been paid down to the finest details, by coordinating a total interior balance with high quality leather, authentic wood that matches the color of the interior, and special fabrics.

Along with the most suitable positions for switches in the layout, access to each movable part is quick and easy, providing dignified comfort and improved efficiency.
