

Combination Meter with Multi-Information Display

A combination meter that overflows with a feeling of high quality is employed, using a black panel with white letters and scales, and red indicator needles that stand out.

A multi-information display that displays easy to understand characters and graphics for drive monitor, warning information and cruise information, has been installed. To emphasize recognizability and efficiency, characters and graphics are displayed in yellow, in the lower section of the combination meter.

Console Box & Door Pocket with Open/Close Mechanism

A 2-level console box emphasizes the efficient use of storage space. This box, among other functions, is illuminated if the lid is opened, and the middle box simultaneously slides back, etc. contributing to ease of use.

189MO09

A large door pocket with an open/close mechanism, which offers excellent storage capacity for large items such as maps, has been adopted.
