Multi Display and LEXUS Navigation System (Option for Europe)

A 7.0-inch wide LCD (Liquid Crystal Display) screen with an IR (Infrared)-sensitive touch panel type multi display has been adopted as an option. This multi display provides a navigation display, an audio operation display, LEXUS park assist display*, trip information display and so on.

*: With optional LEXUS park assist system.

LEXUS Navigation System (Option)

GPS voice navigation, which measures the car's current position through signals from GPS satellites, provides voice and on-screen guidance to guide the driver to the set destination, is available as an option.

- This system includes dual display function which enables the display of a map and turn list, a map and arrow indicators or a map and enlarged drawings of intersections.
- By using a DVD (Digital Versatile Disc) as the map data storage media, handling of large volumes of data has been made possible.
