

---

**EQUIPMENT**

---

## Outside Rear View Mirror

---

Outside rear view mirrors with a full range of convenient functions are adopted.

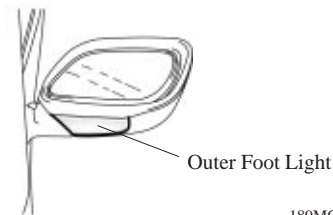

---

### Outer Foot Light

---

Outer foot lights mounted inside the left and right outside rear view mirrors lights up the area the doors when getting into the vehicle and help to assure safety. The outer foot lights are turned on in the following cases:

- When the doors are unlocked with the wireless remote control key.
- When a driver is carrying the smart key and enters the effective range of the smart key system (about 1m from each outside door handle).
- When the doors are unlocked with the door lock control switch inside the vehicle. However, if the ignition switch is on, the outer foot lights turn on only when pressing the door lock control switch and the shift lever is in the P position.

---

### Ignition Switch-linked Automatic Retractable Mirror

---

Turning the ignition switch from the ON/ACC position to the OFF position automatically retracted the outside rear view mirrors. Turning the switch from the OFF position to the ACC/ON position returns the mirrors to their original position.

---

### Automatic Glare-Resistance EC (electrochromic) Mirror System

---

When there is glare from the headlights of vehicles following behind, this glare resistance function controls the reflection rate of the outside rear view mirrors and inner side rear view mirror to prevent the brightness from blinding the driver.

---

### Wiper-linked Mirror Heater Function

---

Mirror heaters switches are linked to the wiper switch, automatically coming on when the wipers start and shutting off 15 minutes after the wipers stop.
