

Electro chromic mirror circuit

CIRCUIT DESCRIPTION

The electro chromic mirror is built in the outer mirror assembly.

The outer mirror electro chromic signal is sent to the room mirror via the passenger door ECU.

WIRING DIAGRAM

INSPECTION PROCEDURE

1 Check electrochromic mirror (See page BE-153).

NG

Replace mirror assembly.

OK

2 Check wireharness and connector between electrochromic mirror and front passenger door ECU (See page IN-35).

NG

Repair or replace wireharness or connector.

OK

Proceed to next circuit inspection shown on problem symptoms table (See page DI-1271).
