

9. Black screen appears when "MAP", "MENU" or "DESTINATION" switch pressed.

INSPECTION PROCEDURE

1 Check navigation ECU.

PREPARATION:

Disconnect the navigation ECU connector.

CHECK:

Check the voltage of terminal +B.

OK:

+B: 10 - 14 V

CHECK:

Check the voltage of terminal ACC when the ignition switch is in ACC or ON position.

OK:

ACC: 10 - 14 V

CHECK:

Check continuity at terminal GND.

OK:

GND: Continuity

NG

Replace or repair wire harness or connector
(See page N-35).

OK

2 Check wire harness between navigation ECU and multi display.

PREPARATION:

Disconnect the navigation ECU and multi display connectors.

CHECK:

- (a) Check continuity of the wire harness between terminal R of the navigation ECU and terminal R of the multi display.
- (b) Check continuity of the wire harness between terminal G of the navigation ECU and terminal G of the multi display.
- (c) Check continuity of the wire harness between terminal B of the navigation ECU and terminal B of the multi display.
- (d) Check continuity of the wire harness between terminal VR of the navigation ECU and terminal VR of the multi display.
- (e) Check continuity of the wire harness between terminal VG of the navigation ECU and terminal VG of the multi display.

OK:

Continuity

NG

Replace or repair wire harness or connector
(See page N-35).

OK

3 Check navigation ECU.

CHECK:

Check the voltage of terminal R, G, B, VR and VG.

OK:

SYNC, VR, VG: See "Navigation ECU" of "TERMINAL OF ECU"

NG

Replace navigation ECU (See page N-35).

OK

Replace multi display (See page N-35).
